

## **Research Trainee Positions**

### *‘Transitions in Pediatric Palliative and End-of-Life Care’ New Emerging Team*

We are currently seeking Master’s and Ph.D. students to join our ‘Transitions in Pediatric Palliative and End-of-Life Care’ team. We are a CIHR-funded New Emerging Team (NET) with the mandate to create knowledge and evidence so children with life-limiting conditions – and their families – get the best care possible. The overall goals of the NET are to:

- 1) Undertake cross-sectional and longitudinal research
- 2) Establish and support new investigators
- 3) Create an innovative model of collaborative and multi-disciplinary/multi-institutional work
- 4) Synthesize guidelines to improve experiences of children/families/caregivers/health care professionals through transitions from diagnosis through bereavement
- 5) Create an evidence base for improved policy and practice
- 6) Create resources for all children, families, practitioners, health service providers, and policy makers

The NET Investigators are:

Susan Cadell, Ph.D. – School of Social Work and Family Studies, University of British Columbia

Betty Davies, Ph.D. – Department of Family Health Care Nursing, University of California San Francisco

Hal Siden, MD – Canuck Place Children’s Hospice/BC Children’s Hospital/University of British Columbia

Rose Steele, Ph.D. – School of Nursing, York University

Lynn Straatman, MD – Canuck Place Children’s Hospice/St. Paul’s Hospital/University of British Columbia

If you are a student seeking funding whose research interests complement our program of research and you are interested in being part of an interdisciplinary pediatric palliative care research team, please forward your CV, a cover letter, and an unofficial transcript to:

Carly Fleming

Research Coordinator, Pediatric Palliative and End of Life Care NET

Centre for Community Child Health Research
